The Cotton Report.

New Orlhans, La., Feb. 10.—Atwood, Violett & Co., say: Futures—To-day the market here has been a very singular one. In response to the improvement in Liverpool of 3-64d there was an advance here of 4 points at the opening, declining subsequently 15 points and finally closing at 2 points better than last night, in all a fluctuation of 28 points.

quently is points and finally closing at 2 points better than last night, in all a fluctuation of 28 points.

The bureau report estimating the amount of the crop marketed to the 1st of February shows that \$8.2-10 per cent had left the plantations, and the first and only conclusion to draw from that was to ascertain what had come into sight on the 1st of February, and if that represented 88 per cent then the remaining 12 per cent would indicate the size of the crop, and it works out \$.500,000 bales. The bureau, however, indicates by a part of its report that the crop will be 500,000 bales less than last year, which would be \$.150,000 bales, but as against this it is almost certain we will have 7.850,000 bales in sight by the 1st of March, and to make the bureau correct, there will then be only 300,000 bales to come into sight after that date. The unreasonableness of this is manifest.

The general opinion here is that the bureau points to a crop of \$.900,000 bales. The course of the market to-morrow will depend almost entirely upon what construction Liverpool may put upon the bureau figures.

almost entirely upon what construction Liverpool may put upon the bureau figures. Port receipts to-day are 22,000 bales against 13,000 bales list year, and the estiagainst 13,000 bales last year, and the esti-matel here for to-morrow is 16,000 bales abainst 19,000 bales at all ports inst year, and indications now are that the amount coming into sight this week will be 200,000 bales. The semi-weekly movement pub-lished by our exchange shows receipts at thirteen towns, 45,000 bales against 46,000 bales area, time but week and 31,000 bules same time has week has year, while stocks are 473,000 bales and 471,000 bales, and 362,000 bales respectively.

New York, Feb. 10.-In view of the facts in the "ceal deal," which were given out to-day, the stock market was a little more than trading in Reading, both in the stock department and the bond list. Certainly were more than half the entire business in both departments.

Of the other coal stocks only Jersey Central made any response to the stimulation and the general list was comparatively quiet and remained feverish and irregular throughout the entire day. The close was active and firm. Net gain in Reading Railroad bonds active and firm.

000 from minor sources of supply. Prime the crop expert, reports January a fairly favorable month for winter wheat. The snow has now all gone, and the past

week has been marked by freezing and thawing weather. The plants as a whole are small and have made little growth. The general condition of the caop is nowhere near what it was a year are.

near what it was a year are.

As an illustration of the decline in the amount of experts from Germany to the United States, due to the operations of the new American tariff inw, it may be mentioned that statistics just issued show the total exports to that country from the United States consular district of Frankfort-on-the-Main to be \$27,390,000 for 1891, as against \$43,000.000 for 1890.

The religion situation has grown worse.

as against \$43,000.000 for 1890.

The railroad situation has grown worse instead of better the past week. The leading roads are evidently short of motive power and are unable to handle the grain business at all the leading Western points. A number of Western roads have refused to accept grain consigned to Eastern roads except in foreign cars. Rail rates remain steady at 25c for fibur and grain and 30c for provisions to New York. Through business was restricted, owing to the inability of the roads to handle traffic. Through rates to Liverpool were weaker and lower, due to the decime in ocean rates. Flour ranged at 57%(303)%c, grain at 36%(37%c, and provisions at 48%(32)%c. Lake freights received more attention and were weaker and lower.

CHICAGO, ILL., Feb. 10.-The anti-option bill pending in coogress had more to do with prices on the boars than all other influences combined. With the fluctuation of opinion and circulating of rumors tending to show it would or would not become a law prices went up or down. The markets, especially wheat, were nervous and "spotty," subject to periods of great activity.

markets, especially wheat, were nervous and "spotty," subject to periods of great activity and excitement, followed by decided duliness. During the fast hour the market continued nervous, closing at an advance of ac compared with yesterday.

Corn—The market was dominated wholly by an uneasy, uncertain feeling which had grown out of the proposed legislation in Washington. Outs—Dull and comparatively steady. Hog products at slightly higher figures. Leading futures closed:
